Commencing at 1:00pm

'ARMDALE PARK' Berry Jerry Lane, Marrar

Garry Armstrong 0427 275 134

WELCOME

We sincerely thank all our valued clients for their continued support and look forward to welcoming both existing and prospective clients to the annual Armdale Park Poll Dorset sale in September.

At Armdale Park Poll Dorset Stud, the focus remains simple: breeding rams that add value to stud and commercial sheep enterprises. We are proud to present another quality team of Poll Dorset rams, selected for the attributes that matter in the paddock, the showing and ultimately at the marketplace. Early maturity, growth, length, muscle and structural soundness remain the foundations of the Armdale Park program, supported by Stockscan and Lambplan data.

The current market presents an exciting opportunity for sheep producers. With lamb values remaining strong and many producers focused on rebuilding and improving their flocks, the value of a high-performing terminal sire has never been more apparent. A quality ram can make a significant difference to the number of lambs reaching market specifications, the speed at which they are turned off and the overall profitability of a commercial operation. The Armdale Park Stud has a proven history in producing the quality sires that enable their clients to achieve these results.

The Armdale Park flock is run under practical conditions, with rams expected to maintain their performance without relying on excessive inputs. Our key focus is on maintaining the stud's genetics at the highest standard possible and aim to provide rams in ultimate working condition ready to do the job for our clients.

The stud is particularly proud of the results being achieved by its clients, with Armdale Park genetics continuing to feature strongly in the show ring and among leading commercial lamb producers, resulting in impressive financial returns at the Wagga Wagga Livestock Marketing Centre again this year.

On offer at this year's sale will be 12 Elite Stud Rams, 112 Autumn Drop Rams and 40 Spring Drop Rams, providing clients with the opportunity to select rams to suit a range of breeding objectives and budgets. We are happy to be offering the volume of rams that allow clients to select rams at a price point that suits their individual enterprises. The muscle scans achieved this year were once again reflective of the attributes keenly sort after by progressive commercial operations. For those who have not attended an Armdale Park sale previously, we invite you to inspect the rams and judge the quality for yourself.

For those seeking to buy Stud Rams, please note that all twelve stud rams have been DNA and genomics tested. The Armdale Park Annual On-Property Auction will commence at 1pm, with rams available for inspection from 11am. The sale will again be interfaced with AuctionsPlus, with sale ram footage available via the Armdale Park Poll Dorset Stud Facebook page and AuctionsPlus closer to sale day.

A light luncheon and refreshments will be provided for all in attendance.

If we can be of any further assistance or to arrange an inspection prior to sale day, please do not hesitate to contact Garry: 0427 275 134 or Chloe: 0472 617 981.

We look forward to catching up with you all on sale day.

-Garry, Catherine & Chloe Armstrong

Scanning for performance traits has become a significant on-farm measuring tool for many years.

Australian STOCKSCAN Services P/L scanner's assess the sheep at around 8-12 months of age for :

- Live Weight (LW)
- Eye Muscle Width (A)
- Eye Muscle Depth (B)
- Fat Depth (C)
- Eye Muscle Area (EMA) is calculated using the eye muscle width and depth measurements ($A \times B$)

The meat index is based on the eye muscle width (A), eye muscle depth (B) and fat (C) measurements , with an adjustment for the age of the sheep, so the index is what the sheeps index would hve been at eight months of age.

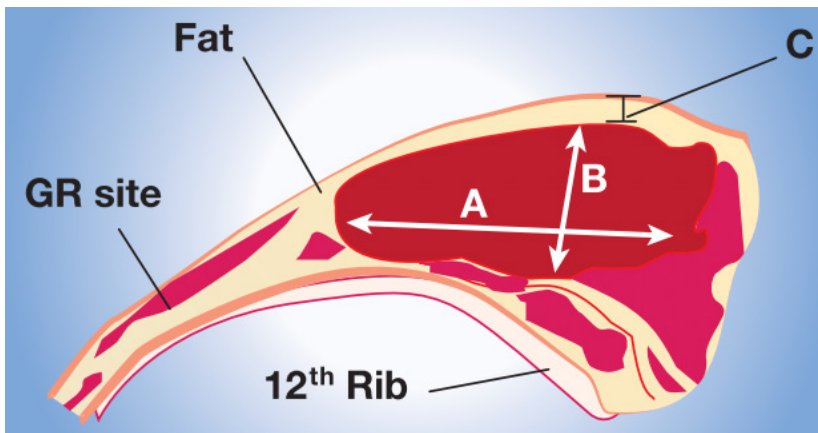

Figure 1: Exposed 12th rib on the carcass cut through the last thoracic and first lumbar vertebrae.

PLEASE NOTE :
*STOCKSCAN figures included in this catalogue
are as at 24th July 2026*

OUR APPROACH TO ASBV_s

This year, for the first time, we have included ASBV_s in our catalogue for anyone wanting to use this information.

Our opinion on ASBV_s has not changed. We do not believe chasing numbers will breed a better sheep. We will chip away at improving our figures over the coming years, but will do so without sacrificing the structure, type and functionality that underpin our breeding program.

We remain focused on breeding the type of rams trusted by our clients to perform — again and again.

Please note: LambPlan ASBV_s as at 1st of September 2026.

STUD RAMS - DNA/GENOMICS TESTING

All selected stud rams have been parentage and genomics tested and are eligible to be registered.

AUCTIONSPLUS

Our sale will once again be interfaced with AuctionsPlus, with videos of both our stud and flock rams uploaded closer to sale date.

This year, our stud ram photographs were taken in a low crop. This is not intended to hide the feet or structure of our rams. Structural soundness and good feet are non-negotiable in our breeding program.

No matter how good a ram is through the body, if his feet and structure aren't to our standards, he won't be in our stud group. We encourage all interested parties to watch the videos on AuctionsPlus to assess each ram for themselves from the ground up.

SIRES

OF ARMDALE PARK 2026 STUD RAMS

TAG

ARMDALE PARK 220200(T) "ELVIS"

COMMENT Sold to Kanangra and Armdale Poll Dorset Studs for \$26,000. A beautifully balanced ram with a great top line, perfect on his legs and feet, with tremendous width over the loin. This ram has real sire appeal with five sons in this years stud group.

TAG

ARMDALE PARK 230059(T)

COMMENT Sold to Boree Lane Poll Dorset Stud for \$15,000. A ram with tremendous carcass shape, width of loin and depth of body. A very correct ram with good eye appeal. A ram we only sold as we retained his full brother, AP220024! The sire of two two rams in this years stud group aswell as our keeper ram

TAG

ARMDALE PARK 240231

COMMENT Sold to Hillview Poll Dorset Stud for \$4,000. An early maturing ram used in stud as a ram lamb. Exhibits the typical Tattykeel 200080 type.

TAG RENE 190100

COMMENT Purchased by Boree Lane Poll Dorset Stud. Semen used after seeing his progeny at Boree Lane. Sire of our 2024 drop keeper ram whos progeny are exhibiting expectional early growth and hindquater.

TAG ARMDALE PARK 230196

COMMENT Retained in stud. Only a small number of progeny as he had a broken leg.

TAG ARMDALE PARK 230343(T)

COMMENT Sold to Ronobri Poll Dorset Stud for \$10,000. A ram with a lot of scale, exceptional length, nice neck and shoulder setting and good on his legs and feet.

TAG ARMDALE PARK 230070(T)

COMMENT Retained in stud. Well balanced Tattykeel 200080 son. Sire of one of our Spring drop keeper rams this year.
